Title:

Comments: I have been riding the lake alpine area for 32 years. We had a cabin at Bear Valley for most of those years. When our son was young he was diagnosed with cerebral palsy. When he was young we discovered anything with a motor on it got our son out into a world he would have otherwise not been able to see much less be apart of. We have enjoyed snowmobiling the scenic land and watching him maneuver over the snow with an ear to ear grin. We have stopped at inspiration point for lunch and then gone out to highland lakes to see just how high he would test his skills. He is and has always been an excellent rider. With out access to these areas I believe he wouldn't have the love of nature that he has to this day. Not everyone can throw on a pair of snowshoes or skies and enjoy the beauty some have to have a motorized vehicle to take them out into gods beautiful country which we all should be able to enjoy. He didn't ask for any special treatment its just luck of the draw that he does need a motor to take him to enjoy it.
