Comments: Hello, I am writing to comment on the addition of Recommended Wilderness Areas in the Nez Perce/Clearwater and would like the forest to not create any RWAs where there are currently trails. There has been a long history of Congress designating wilderness regardless of if those acres are RWAs or not so why not leave it up to congress if they want to designate wilderness in areas that would result in users being kicked off trails.

If there are areas without trails then by all means create RWAs, but lets stop the process of kicking users off trails by creating RWAs.

Thanks,

Chris Cook
