First name: ross

Last name: miller

Organization:

Title:

Comments: Do not approve the above target range project #54559because:

1. The land will be lost to forest for a long time, even if the activity is discontinued, due to metal and other contaminants remaining.
2. This use is incompatible with primary national forest goals.
3. Private enterprise will fund such an activity on private land when a study shows adequate demand.
