Title:

Comments: I am totally opposed to this proposal as it represents an intrusion on a land area that remains relatively undisturbed by commercialization. There are many more suitable areas throughout the county that would be more accommodating to this activity. The noise created by this activity is not only disturbing to humans but unsettling to the native animals as well. This is a beautiful area that deserves not to be affected by the noise and traffic this will create. Doesn't a gun club already exist not far from this location? Land intended for public use should not be compromised in such a manner.
