Comments: I have read the other letters in opposition to the target range, and I would like to make a few points. Anyone that has ever spent much time on a target range will tell you, the wildlife get used to the range, and activity is often halted due to deer or bear wandering into the area. As for safety, I would rather see a designated area for someone to shoot than to just pick a spot in the Forest, go out and shoot with no regard as to what is beyond their paper target. There are thousands of acres in the Forest and allowing a few to be used for the tax paying public that want to use it for something other than looking at trees, I am in support. To those saying there are other areas that can be used, please let the Forest office know about them, because the people that live in the area do not know of any. I say allow the range to open.
