Comments: First and foremost I want to say thank you for the opportunity to comment on this revision and to be apart of the process. As a multi use user (motorized and non motorized) I can not stress enough the importance of motorized corridors. It provides a means of separation between the user groups while giving access to both. I often tour the non motorized portions of the forest one day and the next use the motorized portion of the forest. This provides a unique perspective on the user groups of the forest and how the effect one another. I strongly support alternative C and would like to see more development of motorized corridors in the future.

Thank you for your time.

Rusty Allen
