Comments: Dear Mr. Fitzwilliams:

Please consider my letter in support of the Vail Mountain Snowmaking Project. As a local land planner consistently representing Vail-based businesses, I understand the importance of a robust local economy. Vail Mountain's thoughtfully-developed and operationally smart plans for increased snowmaking that would allow the resort to open more terrain, starting from higher elevations at Mid-Vail and moving west, will allow businesses from Vail Village to Lionshead to cater to more guests early season.

My understanding is that no tree clearing will be necessary and no additional water rights are needed thus I have no environmental concerns.

I applaud Vail for recognizing, after two back to back warmer seasons and little snow early season, that this investment in snowmaking is necessary. This would also allow Vail to offer more appropriate terrain early on for varied abilities in addition to Born Free, which is often too steep for even intermediate guests.

Thank you for your consideration of my support.
