Comments: Access to the Chugach is extremely important for Alaskans. I frequent the Chugach for snowmobiling and split-boarding in the winter and biking in the summer. I have reviewed the different alternatives and they all seem to be biased towards non-motorized use. This is a shame. The 2002 regulations closed a great deal of motorized recreational areas and it worries me that this trend will continue. I don't feel good about any of these alternatives and i think it is wrong to regulate this forest with one set of rules when it is a completely different forest in Summer and Winter.
