Title:

Comments: I support Alternative D. The Chugach is a rich undeveloped resource in a world suffocating in development. People travel far and wide and spend considerable money to witness, view, experience and walk in wild places. The Chugach is an incredible resource for me and for others Americans for all of the various outdoor pursuits.

Look to the present AND the future, protect this pristine ecological resource so we can continue to capitalize on this recreational and economic resource of Alaska.
