Comments: Please consider the evolution of the sport in your evaluations. This is Alaska and as a growing community this is a growing sport. It does no harm to anybody, or any environment. Snowmobiles dont put out any more pollutants out than cars these days. I dont see anybody trying to cut back on highways as more automobiles hit the road!!. We "snowmachiners" should not always be put on the chopping block. Please consider maintaining the areas we have, and expanding as this is a part of our life and culture. Not only is this a hobby, but allows access to hunting, fishing, trapping, and access to family cabins statewide. Please do not take away more recreation from already shrieking alaska activities. It is unsafe to restrict more area in a growing sport as it makes a high concentration of riders in a small restricted area. Thank you for your consideration
