Comments: I have been enjoying the Chugach for 8 years now. Both snowmachining and back country skiing. The country you can access with these machines is amazing. It would be extremely disheartening if my children were to have this taken from them. The areas are already limited. I think with responsible management we can expand the motorized areas and still be respectful to the environment. These areas are extremely crowded and getting more crowded as the years go on, especially with the advancement of the snow machines. I think it is extremely important that we open larger areas to motorized vehicles.
