Comments: My family of five currently ride in the church mountains 9 times a year, it's a great family recreation area please expand our access opportunities. Please do not remove our access points. I oppose losing any access in the church mountains. This mountain range is already heavily regulated for access with motorized vehicles please consider allowing families to utilize the current available areas. Plenty of land is already protected from motorized traffic to provide a sustainable wilderness area. Thank you for the opportunity to voice my opinion
