Title:

Comments: Since 1972 I worked to build the roads in the upper Wynoochee Valley. I helped build the road to Discovery Lake. Road systems were linked from the east side to the west side and the area was opened for recreation. Yes, our tax dollars built those roads for recreation. That is the purpose of those roads in our National Forest. (The Land of Many Uses) Do not shut off our public roads that we worked so hard and paid so much to build.
