Title:

Comments: I reach out to young youth that do not enjoy snow boarding but when exposed to snow machine riding they are interested. The chugach is the closest and only place I can take these youth and expose them to a place that is so prestine yet attainable. Reaching out to these youth in this way is what builds respect and compassion to this resource. No one should stand in the way of being able to build this legacy for our youth. Please contact me if you have any questions.
