Title:

Comments: I use all of the areas available in Southcentral between 20 mile and Seward for snow machine.

We need more areas opened not less.

Back country skiers have blocked so much of the areaS and they have access to all of the areas, and have zero restrictions anywhere.

Snow machines are a cultural part of Alaska history and we need more access to areas for our user group, not less.

Snow machines are quieter than they used to be and cleaner. They also are critical for rescues, and trails for snow machines should be kept open for this reason also.
