Comments: Good morning,

I moved to Alaska in 2009 from New Hampshire. I have never been more amazed by a landscape then after moving here. I have gained the tools over the years to truly experience these landscapes. I love getting my xc skis out and enjoying a peaceful ski through woods with my dogs. I love getting my splitboard out and traversing my way across peaks to enjoy fresh snow outside of the resort. I also love hopping on my snowmachine and covering lots of terrain and getting back to areas that are not easily or quickly accessible. I would hate to lose the access to areas for snowmachining. In my opinion there are many areas for both type of recreator to get out and enjoy our terrain without disturbing the other. Please consider the responsible users of the backcountry and please keep terrain open to machine access. I sure hope someday I'll be showing my children some of these views. Take care and thank you,

Matt
