Comments: Hello,

As a participant of both motorized and non motorized winter sports and an avid hiker in the summer, I can always sympathize with wanting to keep our beautiful lands looking great and in touched. I love the ability to use our lands for motorized sports because it allows the opportunity to go se so much more than would ever be possible by foot. However, I firmly believe that there is always a balance. Motorized vehicles should be aloud, but conditions should be closely monitored to maintain adaquate vegetation preservation. I would much rather the season be closed Eairly than not open for motorized use at all.

Thank you for your time,

Leif Weisner
