Comments: I'm a avid rider in the back country. Yes there are people who break the law, but the rest of the people should not be punished for their actions.

I'm a fisheries biologist and we need to protect the watershed. I believe most of the damage is coming from ATV in the summer. I have seen pictures and videos of people chasing salmon in creeks with ATV's destroying the vegetation. I have seen the landscape from the air, the ATV's are destroying the areas.

I thinks it's time to STOP ATV's in the backcountry!!
