Title:

Comments: As a life long Alaskan I am outraged by the constant attack on our ability to use lands in this state. I use ATV's and Snowmachines for hunting and recreation almost every single weekend throughout the year. We ride snowmachines in Seward, Caribou Hills, Valdez ect ect. Hunting in all those places in the summer as well.

I don't think that these areas should be subject to only one user group or particularly exclude the motorized user group from certain places. In this day and age, these machines are much more quiet and extremely fuel efficient. We are a responsible group that cares about the impact and always trys to leave it like we found it or better.

Alternatives C & D are just not acceptable.

Please leave these areas open to motorized ejoyment for our generation, and generations to follow.

Thanks,

Shaun Jensen
