First name: Dylan

Last name: Christisen

Organization:

Title:

Comments: Taking this away from the community would be devastating. This is a way of life for most. Something that is passed on for many generations. Its groups like us that really care for a place like this forest. While some feel we are destroying the environment we are actually there to help protect and maintain so that others and future riders have the ability and access to such a wonderful place. The ones who are against us riding are people who never step foot off the road to help with this land at all. So with that being said please dont not take this away from us.
