Comments: I am writing in support of Alternative D. The Forest Service should be protecting the wilderness character of the Nellie Juan College Fiord Wilderness Study Area (WSA) to the maximum extent. This would mean the "Primitive' Forest Service standard.

This would include stopping the illegal use of chainsaws in the WSA along beaches and other important and vulnerable areas.

WSA protections should include the areas purchased following the Exxon Valdez spill. When purchased it was promised they would be managed for wilderness character "in perpetuity" and that is the standard which the F.S. should meet.
