Comments: I'd just like to see it left the way it is.

It is perfect the way it is but small improvements for local residents to have access to firewood is not all bad and could reduce potentially wildfires

I am concerned by the possible huge increase in sport fishing, which undoubtedly will result in the demise of fish available for the commercial and subsistence sectors. Especially since some sport anglers are fishing the silver salmon spawning beds and that is a big concern.

Please note that while my mailing address is California I do have property in Wasilla and a home in Anchorage
