First name: Melinda

Last name: Carpenter

Organization:

Title:

Comments: The Forest Service is responsible for managing some of Alaska's most treasured wild lands in the Nellie Juan-College Fiord WSA. Allowing residential timber harvests, expanded motorized uses, manipulation of habitats, mining, and helicopter-assisted skiing and hiking-would harm this beautiful Wilderness. You must protect the "wilderness character" of the WSA. It must have permanent protection now and forever! Humans are supposed to be the most intelligent species on this planet. So, make intelligent decisions!
