Title:

Comments: The Nellie Juan-College Fiord WSA is an ecological and scenic treasure. The current proposed Forest Plan should be changed to:

- 1) Protect the "wilderness character" of the WSA, and by classifying all lands in the WSA with the Forest Service's "Primitive" standard. This is the only way to insure that the changes meet the requirements of the law.
- 2) Restore strong protection to the lands within the WSA that the federal government purchased following the 1989 Exxon Valdez oil spill. These lands were acquired for the restoration of wilderness values and must be managed "in perpetuity for conservation and wilderness purposes," as promised when they were purchased.
- 3) The Chugach NF must address ongoing illegal recreational use of chainsaws in the WSA, which has resulted in damaging tree removal along dozens of wilderness beaches, including in sensitive areas.
- 4) Alternative D recommends the maximum amount of land for Wilderness of any of the Alternatives (97 percent of the WSA, or 1.884 million acres). I support a modified Alternative D wilderness recommendation that also includes Lake Nellie Juan and the lands within the WSA boundary that were purchased for restoration of wilderness resources following the oil spill.

Thank you for considering my thoughts.
