Comments: With Global climate change due to carbon emissions and deforestation occurring worldwide, we need to protect forests throughout the U.S. This WSA Plan must protect the wilderness. The federal government acquired lands within the WSA and promised to protect them in perpetuity, after the Exxon Valdez oil spill. These protections must continue. Illegal cutting of the forest must be stopped. I support Alternative D wilderness recommendation that protect at least 97% of the wilderness, but also want included the WSA lands that were purchased for restoration of wilderness resources following the Exxon Valdez oil spill including Lake Nellie Juan and the lands within the WSA boundary.
