Comments: Please don't shut down the back country to people who will not be able to enjoy it with the aid of a motorized vehicle. I have been all over several states in the back country and have seen small areas of damage to the land inflicted by a small number of people that do not respect the land. I don't believe that the masses should be denied access to the land just because a small number don't follow the rules. Please let the respectful people that may not have the ability to hike or ski into the back country use OUR land. Enforce the land use rules and punish the people that damage the land and leave trash. We the people love OUR land and want to be able to enjoy it. I understand preserving the land but if no one can enjoy it what are we saving it for???
