Title:

Comments: I strongly oppose any new motorized access to the chugiach region by any means, current access and restrictions are already far to stringent and if anything should be further reduce those restrictions, I also strongly oppose any rezoning of these regions to be restructured as wilderness. Please keep current regulations as they are, do not further restrict the population from enjoyment of our resources and public lands, we feel as if we are personally being attacked by the NFS as it is by any new restrictions or changes .
