Title:

Comments: Please protect the full "wilderness character" of the WSA lands and classify them with the strongest "Primitive" standard. This land was acquired for the restoration of wilderness values after the Exxon Valdez oil spill and should have those strong protections restored. The Chugach Natl. Forest must stop the illegal recreational use of chainsaws that has caused tremendous damage in wilderness beach areas. Please pass Alternative D and include Lake Nellie Juan and the land acquired after the Exxon Valdez spill for the restoration of wilderness. Thank you!
