Comments: I am going to start by saying I love the Chugach forest. I play there in both the winter and summer, motorized and non-motorized. From hiking and biking to snow mobiling. I strongly feel that we should increase the size of the motorized use area. Not only for winter vehicles but for 4 Wheeler's and ATVs also. I believe that if we were to decrease the size of the motorized area we would see greater damage due to congestion of people and motorized vehicles. If we increased the size of our motorized access there would be far less congestion and damage to the forest since people would have more options at their disposal. So please, do not reduce the size of motorized use in the Chugach forest.
