Comments:

Our country's wilderness area needs protection from policies that allow the general public to use them for recreational purposes. An uncaring, unknowledge public should not be allowed to enter these areas by feet or vehicles.

It is the Duty and Responsibility of the Forestry Service to protect and defend the wilderness. Unfortunately, the current Administration and many of the current members of Congress do not see any value in this country's wildlife, wildness areas, wetlands, or any other environment that is not inhabited by human beings. They are creating policies and directives that destroy and endanger the same lands that you and your fellow conservative officers have sworn an oath to protect. Please protect these lands against destructive policies.
