Comments: Any changes to the Forest Service's Final Plan and Environmental Impact Statement should further protect the Nellie Juan-College Fiord WSA, specifically its "wilderness character," by classifying all lands as "primitive."

I support a modified Alternative D wilderness recommendation that also includes Lake Nellie Juan and the lands within the WSA boundary that were purchased for restoration of wilderness resources following the oil spill, and encourage a crackdown on the ongoing illegal chainsaw use.

These lands must be managed "in perpetuity for conservation and wilderness purposes," as promised when they were purchased.
