Title:

Comments: Trump is a very dishonest person and has mental issues. He does not care about people, the earth's environment and all life forms on earth. He only cares about his sick ego and money. He needs to respect people, the earth's environment and all life forms on earth. Also, there are many politicians that only care about their greed for power & money. These people need to be honest and respect all people, the earth's environment and all life forms on earth.
