Title:

Comments: As an avid snowmobiler I enjoy riding in the Chugach Mtn Range. I also fish in the Kenai Peninsula which will affect my harvest of food for my family. Enjoying these activities it's more than recreation it's a lifestyle. I would want my child and future generations to enjoy what Alaska has to offer subsistently and recreationally. I do oppose this 36 CFR 219 subpart B. This CFR will be affecting Alaskans like myself who hunt, fish and gather food subsistently to provide for their families in which the culture the families live by will die off. If an individual gets hurt who may need medical attention the only way to get to the individual who lives in the remote areas of the Chugach is only by a motorized vehicle, ie. Snowmobile, ATV, boats etc. Re-think and re-evaluate who you are effecting for those who pass down subsistent lifestyles. Thank you for your time.
