Comments: Areas like this should be used by all people and should be enjoyed by all people. The damaged caused by motorize vehicles is very low and can be kept low if managed correctly. Even if there is no motorize vehicles the damage can be way worse, by leaving garbage and debris, destruction to the environment by allowing people to damage the vegetation. All the people that use these areas should be educated before they use it in one way or another. Shutting down the use of motorized vehicles could hurt the economy for the areas and that will entail jobs losted and could escalate from there. Like I said before it should start with a little education for everyone and a way to manage these areas by having government funding for programs to educate and manage these areas.

We take for granted the world we live in and we need to learn manage the world we live in even it is on such a small level and one area at a time.
