Comments: The Chugach Forest and Park is home to thousands of people, residents and tourists alike, who come to Alaska for the activities they are allowed to enjoy in the great outdoors. Whether this be on a motorized vehicle or on foot, the park should be open and available to anyone who wants to spend their time and money how they wish. Of course limitations on location of motorized vehicles should still be applied, these regulations that will prohibit motorized vehicles is insured and goes against families that want to enjoy these types of activities. Every Alaskan that has been raised in this great state and transplants alike will know that the Chugach Forest is home to everyone. I strongly go against this new project and advise everyone else to be against it.
