Comments: I use these areas for motorized and non-motorized usage. I feel that use of this area should be for everyone, not just one group. Keeping these places open is an important part of living in Alaska. We only have so much area that we can get to easily and if these areas get shut down it will push more motorized users to smaller areas and create more issues with others. These areas are good for all and there is plenty of room for all recreational activity's. Keep the area open.
