Comments: When the CEO of Shell says that we need huge reforestation to slow climate change, you turn around and ask to decimate 70,000 acres of forest. Please stop wasting taxpayer money to line the pockets of the timber barons. It is time to rejuvenate the forest not destroy it. It is time to care for lynx and grizzly and other species dying off from human intervention. This project needs to be stopped. Log in the CPZ and educate people who live near the forest to take care of their own homes. Stop this waste of taxpayer funds and this destruction of important carbon sinks.
