Comments: Snowmachining has been a part of my life since moving to the state of Alaska in 1992. I started when I was a child and now I am older I enjoy the sport with my children. I fully support plan B, I would like to see us look at opening more areas to motorized use. The sport has nothing but positive affect for our state. It is a way of life here and is important to a great number of Alaskans. It is important to our economy as well as a social aspect. It is water cooler talk on Monday mornings and the stuff of fantasy during the summer for a lot of us. I believe we can share these lands with others and have less impact now than ever before. I do not believe the answer lies in isolating and cramming the ever increasing amount of users on on minimal amount of accessible land.
