Title:

Comments: I was born and raised in Soldotna Alaska so the CNF is a huge part of my childhood. I have hunted, hiked, biked, and toad snowmobiles in these areas my whole life and love nothing more than to be in the mountains enjoying the wild life and wilderness. Taking away this forest from us would be like taking away our life's. We live in a state that does not offer a lot of activities besides the outdoors. I for one would be heart broken to see any changes at all for me and the sake of our statehood. I will and want to fight next to any one on the page who wants to keep what we have. Alaska the last frontier keep it going don't take away everything we love and know.
