First name: Andrew

Last name: Mccann

Organization: Arctic Backpacking and Camping LLC

Title: Owner

Comments: What negative impacts do motorized vehicles in this area currently create? The beater question may be, what are we wanting to accomplish. Is a plan improvement that involves restricting access even further the best benefit for all? Does it provide something more beneficially to the human race or even significant positive impact to wildlife or the landscape? Please keep in mind Alaska, my home and yours, is the LAST FRONTIER. This includes my ability when applicable to access these areas for recreation activities. Please choose a plan that has the least impact to recreational activities that do nothing to harm our great lands.
