Comments: You are in charge of our country's last truly wild acreage of substantial character. It is special, and I hope you will protect it by naming all of the lands in the WSA as "primitive." Yes, we live in California, but every 4 years we spend the summer in Alaska. There is no place like it in the USA. It should be managed and conserved forever as one of our nation's treasures.

I know you already have a plan, but it needs to be strong to prevail. The Chugach NF has to enforce the laws it has regarding chainsaws in the Chugach. I support a modified Alternative D wilderness recommendation that includes Lake Nellie Juan and the lands that were purchased for restoration of wilderness resources following the oil spill.
