Comments: I've lived in Alaska since 1974 and have been enjoying mountain access for in the chugiak mountains since the early 90's. I share the Life and love of the mountains with a large population of Alaskans , and never have I spent time with anyone whom didn't respect the areas we all love , weather skiing , snowboarding or snow machining . Do I believe creating laws preventing us as Alaskans less access to mountain areas does no good at all , if perhaps there are folks that believe our access is damaging the areas they really should do more research . Without the people whom care about the areas the most are the ones that use these areas take that away from will be more damaging , keep these areas open and accessible ..
