Comments: To whom it may concern.

I strongly support alternative B.

The Chugach National Forest is intended to be used by everyone (including those of us who access the backcountry using motorized means)

I've lived in Alaska for 27 years and enjoyed this access for many of those years.

Comments posted by folks who don't live in Alaska nor have ever been here cannot accurately capture the true alaskan spirit of fair and equal treatment for all people.

I look forward to many years of enjoying the chugach.
