Comments: Please do not reduce our already limited motorized access.

Realize the few comments in support of motorized access come from people who work, hunt and do not have a great deal of time to lobby on their own behalf. I myself am doing this after my family has gone to bed (which is where I should be). In other words, we are very under represented.

If you must, impose noise restrictions, and enforce them. But please do not penalize those of us with motors because those without don't want to share. It's really not that hard to get away from the noise, and there are other more tolerate ways to share the trail.
