Comments: I don't get in the mountains as much as I would like, but putting more restrictions is stupid!! You want people to enjoy what we have here. It's like no where else on earth. People from the lower 48 should have no real say in what we do with our forests. If they want those type of restrictions in THEIR state than let them have it. We have people from all over come to enjoy our state all year long, by putting more restrictions on, they will not come. Which means lost revenue for us all. Environmentalists will do ANYTHING to push their agenda on us all so we can't enjoy our own state.
