Title:

Comments: I have noticed that there are several people from out of state making comments on this subject. Some or most of them have never been to Alaska and never will. I do not see how they can make suggestions on how we use the forest when we are the ones who live and here and use it on a daily basis. I have been an avid skier for a good portion of my life, but as I get older and problems with my knees I can't access the forest the same and need to use a snowmachine. I strongly oppose any further restrictions on motorized vehicles than are currently in place and would prefer more motorized access. We need to make it accessible to all and not just a few! Not only do I use the forest for recreation. I also use my snowmachine to access vital weather equipment for maintenance. This becomes a much more viable alternative than using aviation means.
