Comments: The State of Alaska provides opportunities for a diverse group of people. Restrictions imposed on areas limiting the use deprives individuals from enjoying activities this state has to offer. Motorized sports are an expensive hobby and significant investments made by individuals to partake would become even more costly if forced to drive greater distances in an effort to enjoy this great state. I do not believe any areas should be closed to motorized sports. We live in one of the last great places, adding restrictions and unnecessary rules takes away from the majesty and enjoyment so many pursue.
