Comments: Please accept my comment on this topic. I do not support further restriction to these areas for motorized use. I am an avid participant in these areas both Summer and Winter. I use various types of vehicles to explore and enjoy all of these areas as well as exploring without motorized vehicles. These areas are vital to the life and health of many people in this area. I am quite confident the private motorized use is non destructive and even a blessing to these areas. It is fact I and the groups I am associated with clean up, take care of and regularly maintain trail and parking areas without any Government intervention. I have also been an advocate for proper and legal uses in endangered areas.

Please reconsider your decision to close these areas based on outside interest and other groups using political leverage to deny further use by citizens who appreciate, take care of and use these areas for pleasure. Thank you.
