Comments: Hello, my name Jesse Keller and I have come to comment to support plan B.

I am a born and raised Alaskan who is an avid snowmachiner. I think continuing with our current land and snow depth requirements will be more than sufficient and options C and D should not be even thought about. This is very important to me because it is my life. During the winter months I usually go out 2-5 times a week. This only helps Alaska's economy with the sales of fuels oils and repairs. I know I am one of many Alaska's who are here because of this open access to wild lands.

I with Alaska growing we should be thinking of was to open more trails and backcountry over the detrimental closing of lands . Thanks for your concideration,

Jesse Keller
