Comments: I am a long time Alaskan and outdoor enthusiast. I participate in snowmachine recreation in the Chugach National Forest areas that are included in the proposed management plan revision. I am against closing these areas to snowmachiners. Todays machines are much more fuel efficient, quiet, and environmentally safe. When these areas are open, I recreate in those areas multiple times a year. Please do not remove these amazing areas from our backcountry use. We as a community respect and appreciate these areas for their terrain, beauty, and ease of access from the designated parking areas.
